

From: „Recumbent UK“, 2001

My favourite new recumbent was the QUANTUM Toxy.

QUANTUM is known for high-quality, inexpensive alloy-framebikes.

They use square-tubing on their other models, but the Toxy comes with round-tubing, a neat package with its fully suspended 20"/20" wheels and compact wheelbase of 95cm.

You can choose between OSS and ASS, and one converts to the other quickly. You also have the choice of hardshell or mesh seat.
